

Business Meets Science

Collaborative opportunities with
Rhine-Waal University of Applied Sciences

Interested in empowering young people?

With a Deutschlandstipendium, you can have a direct impact on the lives of young, talented students and make a significant contribution to encouraging future qualified employees to pursue careers in our region.

By funding this scholarship, you help students to focus all of their time and energy on their studies and lay the foundation for their first professional network.

Take advantage of new synergies and networking opportunities!

✉ deutschlandstipendium@hochschule-rhein-waal.de

Searching for qualified employees?

We maintain a student job portal for a variety of postings:

- Thesis projects
- Short and long-term internships
- Student temp positions
- Entry-level positions

You can also get to know future employees at our regularly held networking events.

Contact us to learn more about different approaches, and our various events for companies and students.

Need new research and innovation capacity?

Companies can benefit from our know-how and technology in a variety of ways.

As regional innovation partners with an international research network at our disposal, we can support your efforts in:

- Research and development
- Commissioning research
- Collaborating with doctoral researchers
- Applying for available research funding

✉ forschung@hochschule-rhein-waal.de

Searching for new contacts for your R&D?

Take advantage of our networks!

We can put you in touch with the right experts for your project needs.

We regularly organise networking events together with:

- Universities, organisations, associations, industry and policy makers
- Students, companies and other external stakeholders
