

## Selection process at Rhine-Waal University of Applied Sciences

### Who will take the decision?

The selection committee suggests a rank-ordered list of applicants to the executive board. The board will then make a decision. The ranking of applicants is based on primary and secondary criteria, according to the guidelines.

### The selection process

1. Handing-in the online-applications;
2. We will check if the applications are complete and the GPA is correct;
  - **incomplete applications will not be regarded for the further steps**
3. Each faculty prepares individual rank-ordered lists of their respective applicants. The share of applications each faculty receives is based on their share of enrolled students;
4. The selection committee discusses the rank-ordered lists and forwards them to the executive board of the university. The board will take the decision to approve or to amend the lists.
5. Valid applications for the extension of the scholarship are prioritized over first-time applicants;
6. Mailing of the acceptance and rejection letters, normally within six months after handing in the application.
