

# BIOENGINEERING, B. Sc.

## STUDIENVERLAUFSPLAN IN VOLLZEIT

### 1. Semester

- Cell Biology and Microbiology
- Fundamentals of Chemistry
- Basics of Physics
- Mathematics and Statistics
- Basics of Management
- Project 1

### 2. Semester

- Genetics and Molecular Biology
- Applied Chemistry
- Biochemistry
- Bioengineering Physics
- Applied Microbiology
- Applied Mathematics

### 3. Semester

- Physical Chemistry
- Instrumental Analytics
- Measurement and Control Engineering
- Process Engineering
- Basics of Economic Sciences
- Applied Management

#### Elective Modules 1:

- Technical Enzymology
- Biofuels
- Agricultural Biotechnology
- Biopolymers
- Medical Bioengineering
- Nanobiotechnology
- Modeling of Dynamic Systems
- Free Choice

### 4. Semester

- Bioprocess Engineering
- Enzyme Engineering
- Project 2
- Elective Modules 1

### 5. Semester

- Basics of Law
- Industrial Biotechnology
- Downstream Processing
- Integrated Management Systems and Quality Management
- Elective Modules 2

#### Elective Modules 2:

- Biocatalysis
- Metabolic Engineering
- Cellular Biophysics
- Environmental Biotechnology
- Microalgae
- Immunology
- Free Choice

**Praxis- oder Auslandssemester (20 Wochen)**

**Bachelorarbeit (3 Monate)**

#### Kontakt

**Hochschule Rhein-Waal**  
**Fakultät Life Sciences**  
Marie-Curie-Straße 1, 47533 Kleve, Germany  
Email: life-sciences@hochschule-rhein-waal.de

**Studiengangsleiter:**  
Prof. Dr. Joachim Fensterle  
Prof. Dr. Björn Neu
