

The Rhine-Waal University of Applied Sciences in Kleve and Kamp-Lintfort offers an innovative, international environment combined with first-rate teaching in interdisciplinary Bachelor and Master's degree courses, taught mainly in English. It is strong in conducting research in disciplines such as technology, natural sciences and social sciences. More than 7,500 students have already enrolled at the Rhine-Waal University of Applied Sciences.

The University of Applied Sciences has to award for the faculty Life Sciences in the Master's degree courses Biological Resources M.Sc. at the campus in Kleve in the winter semester 2020/2021 the following

Lectureship

within the meaning of Section 43 of the Law regarding the Universities in the State of North Rhine-Westphalia (HG NRW):

Reference number 35/LA/20

Subject area/Module: „Lecture series biological resources“

The lecturer shall take over the lecture in the amount of 3 lecturing hours per week in the module "Lecture series biological resources" of the master course Biological Resources, M.Sc.. The lectures shall be held in English.

Due to the current pandemic, lectures shall be held in a digital format and shall begin as of November 02, 2020.

Teaching contents

In this lecture series students will be exposed to interdisciplinary perspectives on biological resources and their management. Invited lecturers will present results and methodological approaches of their recent research and professional work in the field of biological resources and related disciplines. The lectures will provide participants with the opportunity to experience and engage in academic debate thereby obtaining further stimuli to define the topic of their own research project.

On successful completion of this module, students should

- understand core concepts of global biological resources and their sustainable management
- know the predominant discourses and theories in managing and governing these resources
- know methods and analytical tools used in contemporary research on biological resources
- identify the key factors that determine the state and resilience of global biological resources
- document results and findings in a scientifically appropriate form

Requirements:

The lecturer shall have a corresponding university degree and have practical experience. Didactic skill and the ability to hold the course with an international group of students in the English language are required (the language level shall be C1 according to the European reference framework).

The Rhine-Waal University of Applied Sciences offers lectures a systematic networking with the university as well as the opportunity of a specific training development to ensure a sustainable skill improvement, a closely link between theory and practice and a support for the personal development of lectures.

It is asked to send in just copies of documents as these cannot be returned.
