Module GD 6 6037: Internship or Semester Abroad.....	54
Module GD 7 6038: Workshop: Academic Writing	55
Module GD 7 6039: Applied Project.....	56
Module GD 7 6040: Project.....	57
Module GD 7 6041: Bachelor Thesis	58
Module GD 7 6042: Colloquium.....	59
2.4. Forms of Examination	60

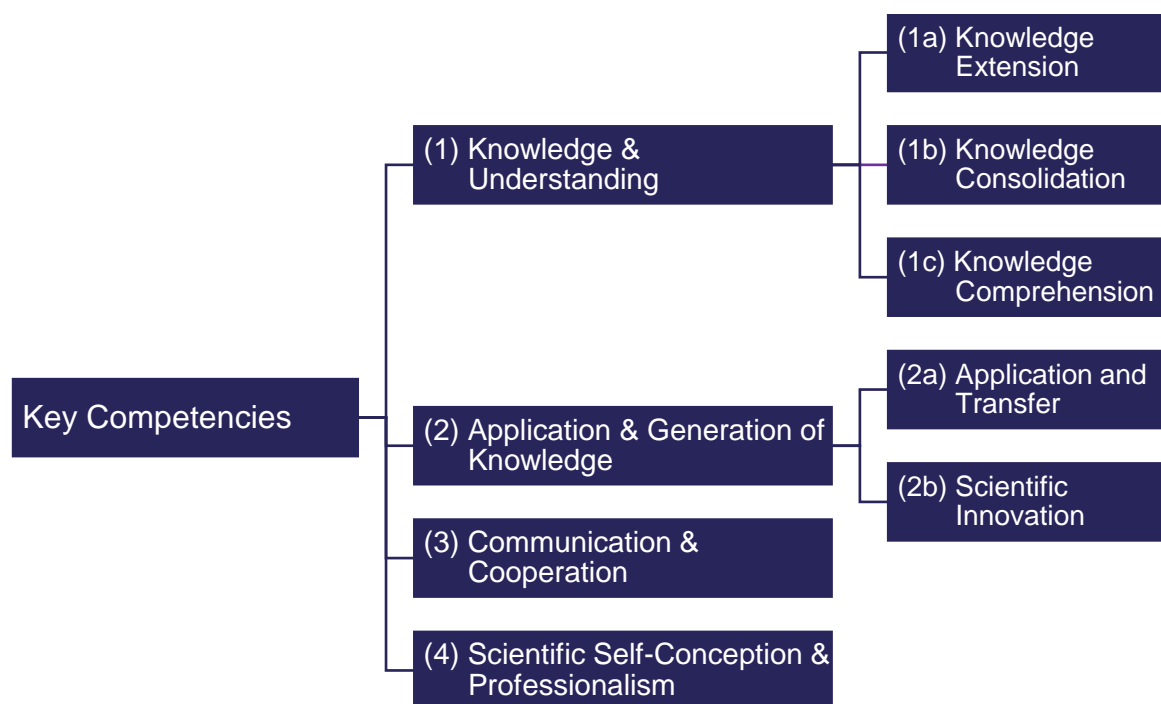

1. Information about Study Programme

1.1. Profile of Study Programme

Place of Study	Campus Kleve
Start Date	Winter Term
Language	English
Study Model	Full-Time Studies
Duration of Study	7 Semesters
Amount of Credits	210 ECTS
Degree Awarded	Bachelor of Arts, B.A.
Examination Regulation and Further Information	https://www.hochschule-rhein-waal.de/de/fakultaeten/gesellschaft-und-oekonomie/studienangebot/gender-and-diversity-ba

1.2. Key Competencies

The study programme *Gender and Diversity, B.A.*, teaches the following competencies on Bachelor-level: (1) knowledge and understanding, (2) use, application and knowledge production, (3) communication and cooperation, (4) academic conduct/ professionalism. These competencies are outlined in the *German Standards for Higher Education* (Ministry of Education Conference on February 16, 2017; https://www.kmk.org/fileadmin/Dateien/veroeffentlichungen_beschluesse/2017/2017_02_16-Qualifikationsrahmen.pdf) and are described in more detail within the course descriptions included in this study schedule.

Abbreviations: CH - Contact Hours per Week; L = Lecture; S = Seminar; E = Exercise; Pra = Practical Training; Pro = Project; EX = Type of Examination; E = Examination; C = Certificate; CP = Credit Points; WT = Winter Term; ST = Summer Term

*As elective subjects, a maximum of 5 CP can be chosen with the consent of the examination committee from any study programme at the Rhine-Waal University of Applied Sciences. "

**The faculty reserves the right to determine a minimum number of participants for offering an elective subject. The possibility to obtain the required number of credit points remains unaffected

2.2. Applicability of Modules

The modules of the study programme *Gender and Diversity, B.A.* are mandatory and elective courses for this programme. For mandatory modules, applicability is restricted to the programme *Gender and Diversity, B.A.* Elective modules in semester 4 and 5, in particular the module foreign language, GD 4 6036 / GD 5 6036, can be used for other study programmes, depending on the rules of the individual programme. The elective module GD 4 6029 *Introduction to Accounting* is equivalent to module IB 2 6029 in the study programme *International Business and Management, B.A.* The module GD 5 6032 *International Market Research / Project and Campaign Management* is equivalent to the elective module IR 5 6032 in the study programme *International Relations, B.A.*, and the elective module GD 5 6035 *Behavioural Decision Making* is equivalent to the module IR 5 6035 in the programme *International Relations, B.A.*

2.3. Description of Modules

Module GD 1 6001: Gender History and Women's Movements

Classification	Study Semester	Offer	Equivalent	Language	Responsible Professor
Required Module	1	Winter Term	-	English	Prof. Dr. Eva Maria Hinterhuber

Size of Group	Workload	Contact Hours	Self-Study	Credit Points
up to 72	150 h	60 h	90 h	5

Formal Prerequisites	Recommended Prerequisites	Further Information
-	-	-

Learning Outcomes*
<p>After successful completion of the module:</p> <ul style="list-style-type: none"> • Students know about the history and academic study of gender, gender equality activism and antidiscrimination movements.^{1a} • They can apply and critique models in regard to historical and modern day social movements.^{1b, 2a} • Course participants are familiar with the core projects of historical women's movements.^{1a} <p><small>* 1 = Knowledge and Understanding, 2 = Use, Application and Production of Knowledge, 3 = Communication and Collaboration, 4 = Academic Conduct and Professionalism</small></p>

Content
<p>The course starts with a theoretical framework and conceptual definitions for the academic study of civil society in general and social movements in particular. Against this background, an introduction to the study of gender history is provided, specifically with a view on gender and power. After this theoretical and historical introduction, in the second part of the course students learn about historical women's movements and gender equality activism. The model of three waves of feminist activism is introduced and critically discussed. For each phase of gender equality movements, students learn about core political projects and historical events and are able to familiarize themselves with primary sources. In the third part of the course, students acquire specialized knowledge of a contemporary or present day gender equality or antidiscrimination movement by applying the analytical framework introduced in the first part of the course to selected examples. Throughout the course, a broad spectrum of typical applications from all over the world is considered.</p>

Course(s)	Contact Hours
GD 1 6001: Gender History and Women's Movements (Lecture)	4

Requirements for the Awarding of Credit Points	Possible Examination	Significance of Mark
Examination	Written Exam, Oral Exam, Presentation or any Combination	2,5 %

Module GD 1 6002: Basics of Sociology

Classification	Study Semester	Offer	Equivalent	Language	Responsible Professor
Required Module	1	Winter Term	-	English	Prof. Dr. habil. Tatiana Zimenkova

Size of Group	Workload	Contact Hours	Self-Study	Credit Points
up to 72	150 h	60 h	90 h	5

Learning Outcomes*
<p>After successful completion of the module:</p> <ul style="list-style-type: none"> Students will know the basic principles of studying people and society.^{1a, 1b} After the course, they will be able to apply basic sociological thought on a wide range of social fields.^{1c, 2a} Students will be able to apply theories, methodologies and selected fields of sociological investigation to the study of gender and diversity.^{1c, 2a} With the help of different schools of thought, students will be capable to locate and reflect on the theories behind e.g. policies, research studies and ways of thinking. Students will also learn to reflect on the status of (scientific) knowledge that they will encounter during their study and in their future professional fields of practice.^{1b, 1c, 2a} <p><small>* 1 = Knowledge and Understanding, 2 = Use, Application and Production of Knowledge, 3 = Communication and Collaboration, 4 = Academic Conduct and Professionalism</small></p>

Content
<ul style="list-style-type: none"> Lecture and seminar open a perspective to the basics of sociology and invite first semester students to take up a sociological perspective. The module introduces the basic principles of studying people and society by giving an overview of sociological theories as well as on sociological research methods The lecture gives multiple insights in sociological questions and highlights the significant impact of sociology on the understanding of the complexity of contemporary societies. Starting with an overview over classical sociological theory, the history of sociological theory is as much taken into account as discussions of the transformation of societies and more recent theoretical influences, such as feminist theory, critical theory, post-structuralism, post-modernity, and globalization theory The lecture is additionally discussing a wide range of relevant fields of sociological research and social praxis. The accompanying seminar focuses on reading, discussing and understanding basic theoretical texts of sociology

GD 1 6002: Basics of Sociology (Lecture + Seminar)	4

Requirements for the Awarding of Credit Points	Possible Examination	Significance of Mark
Examination	Written exam, Presentation or any Combination	2,5 %

Module GD 1 6003: Introduction to Gender and Diversity Studies

Classification	Study Semester	Offer	Equivalent	Language	Responsible Professor
Required Module	1	Winter Term	-	English	Prof. Dr. Ingrid Jungwirth

Size of Group	Workload	Contact Hours	Self-Study	Credit Points
up to 72	150 h	60 h	90 h	5

Formal Prerequisites	Recommended Prerequisites	Further Information
-	-	-

Learning Outcomes*
<p>After successful completion of the module:</p> <ul style="list-style-type: none"> Students have a basic knowledge of gender and diversity studies. This includes different fields of study and practice fields of gender and diversity concern. Moreover, students are familiar with theoretical approaches on the construction of gender, ethnicity and race, (dis-)ability, sexualities as well as socioeconomic inequalities.^{1a, 1c} <p><small>* 1 = Knowledge and Understanding, 2 = Use, Application and Production of Knowledge, 3 = Communication and Collaboration, 4 = Academic Conduct and Professionalism</small></p>

Content
<ul style="list-style-type: none"> Students learn about theoretical approaches to gender and diversity studies and practice fields. They understand crucial approaches of gender studies, migration studies, the study on racism, sociology of health and the body, disability studies as well as sexuality and queer studies. In the lecture the development of gender theories is discussed, starting from the beginnings of women's studies in relation to women's movements since the 1960s. While theories developed in women's studies explored the distinctiveness of women's experiences in relation to men's experiences, later theoretical developments refer additionally to differences between women and other relations of inequality than the gender divide. Issues such as work, class, the construction of race, migration studies, as well as sexualities become topics of gender and diversity studies. Finally, the further development of diversity studies as an interdisciplinary field is presented and discussed. In the seminar students learn to work with scientific skills such as reading and summarizing academic texts and preparing and doing a presentation.

Learning Outcomes*
<p>Having successfully completed the module:</p> <ul style="list-style-type: none"> Students have a critical understanding and knowledge of methods and concepts necessary for planning, organizing, and conducting projects. Moreover, students are familiar with mentoring as a classical personnel development tool and they possess practical mentoring skills from their mentoring experience with peers. <p><small>* 1 = Knowledge and Understanding, 2 = Use, Application and Production of Knowledge, 3 = Communication and Collaboration, 4 = Academic Conduct and Professionalism</small></p>

Content
<p>Mentoring: The seminar focuses on mentoring as a method in developing equal opportunities. Students learn about the basic principles of mentoring and coaching and they will practice applied methods of mentoring in order to develop an experienced and differentiated knowledge. Students learn to use mentoring methods in peer groups. Practical exercises accompany the seminar.</p> <p>Introduction to scientific skills: During the course, the relevant steps in conducting and presenting own academic work is discussed. These include:</p> <ul style="list-style-type: none"> Understanding and practice of academic writing principles Planning and organization of academic work Self-management Avoiding plagiarism Referencing and citation rules Literature review Writing an academic paper Presentation techniques

Course(s)	Contact Hours
GD 1 60051: Mentoring (Lecture + Exercise)	2
GD 1 60052: Introduction to Scientific Skills (Lecture + Exercise)	2

Requirements for the Awarding of Credit Points	Possible Examination	Significance of Mark

Module GD 1 6006: Globalisation and Social Change

Classification	Study Semester	Offer	Equivalent	Language	Responsible Professor
Required Module	1	Winter Term	-	English	Prof. Dr. Ingrid Jungwirth

Size of Group	Workload	Contact Hours	Self-Study	Credit Points
up to 72	150 h	60 h	90 h	5

Formal Prerequisites	Recommended Prerequisites	Further Information
-	-	-

Learning Outcomes*
<p>After successful completion of the module:</p> <ul style="list-style-type: none"> Students understand basic concepts and theories of globalization and social change related to globalization processes. They understand the concept of globalization as the compression of time and space and the intensification of interrelations between nation states, economies, politics, culture and – last but not least – social actors. <p><small>* 1 = Knowledge and Understanding, 2 = Use, Application and Production of Knowledge, 3 = Communication and Collaboration, 4 = Academic Conduct and Professionalism</small></p>

Content
<ul style="list-style-type: none"> The courses in this module give insight in developments of globalization in different dimensions. The lecture focuses on social, economic and political processes within societies as well as between societies, which have led to social change. This includes theories and empirical research on population change, such as demographic developments and migration movements. Moreover, urbanization and ecological dimensions of globalization are discussed. Political issues include the development of social movements as well as the imaginary of globalization, which refers additionally to a cultural dimension of globalization. Global economy and inequality are focused as well as cosmopolitanism as an approach to conceptualizing solidarity beyond the borders of the nation state. In the seminar exercises and assignments are done, learning about the development of a term paper and types of text in academic writing as well as applying these.

Course(s)	Contact Hours
GD 1 6006: Globalisation and Social Change (Lecture + Seminar)	4

Requirements for the Awarding of Credit Points	Possible Examination	Significance of Mark
Examination	Written Exam, Oral Exam, Term Paper, Presentation or any Combination	2,5 %

Classification	Study Semester	Offer	Equivalent	Language	Responsible Professor
Required Module	2	Summer Term	-	English	Prof. Dr. habil. Tatiana Zimenkova

Size of Group	Workload	Contact Hours	Self-Study	Credit Points
up to 72	150 h	60 h	90 h	5

Formal Prerequisites	Recommended Prerequisites	Further Information
-	-	-

Learning Outcomes*
<p>After successful completion of the module:</p> <ul style="list-style-type: none"> • Students have a basic knowledge of qualitative social research methods and methodologies^{1, 2}. • They understand paradigmatic research styles¹ in theory of qualitative research¹ and qualitative methodology by their first practice in methods of qualitative data analysis.² • They can describe the stages of the qualitative research process^{1, 2} and they hold reflexive experience in conducting and analysing interviews. <p><small>* 1 = Knowledge and Understanding, 2 = Use, Application and Production of Knowledge, 3 = Communication and Collaboration, 4 = Academic Conduct and Professionalism</small></p>

Content
<p>The module gives students theoretically informed and practical insights into qualitative research. Students will learn about paradigmatic research styles and will reflect on theory of qualitative research. There is also a focus on qualitative methodology. Moreover, students practice qualitative data collection and analysis and they will practice in methods of qualitative data analysis and gain reflexive experience in conduct and analysing interviews with a focus on the following aspects:</p> <ul style="list-style-type: none"> • Epistemological issues of interviewing • Ethics of qualitative research • Planning an interview study • Conducting an interview • Interview variations • Interview quality • Transcribing interviews • Analysing interviews • Validation and generalization of interview knowledge • Reporting interview knowledge • Enhancing interview quality

Learning Outcomes*
<p>After successful completion of the course:</p> <ul style="list-style-type: none"> Students have developed advanced awareness and analytical skills regarding discrimination practices in the workplace, in educational contexts, organizations and institutions.^{1a, 1b} Students know different approaches such as anti-racism, anti-bias and gender training methods. Students know how to plan training and what to take into consideration for the planning. They have gained theoretical and practical knowledge about applied methods in equal opportunities.^{2a} Students have enhanced their self-reflectivity in regard to social processes of discrimination by acquiring basic knowledge about a variety of applied methods in equal opportunities.^{3, 4} <p><small>* 1 = Knowledge and Understanding, 2 = Use, Application and Production of Knowledge, 3 = Communication and Collaboration, 4 = Academic Conduct and Professionalism</small></p>

Content
<ul style="list-style-type: none"> Institutions, organizations and the workplace are changing and there is a growing demand for the inclusion of women and societal minorities such as migrants and international workers, persons with disabilities and people who are older than the average. This opens the chance to discover new goals and to develop a new culture of recognition. Students will learn about methods with which self-reflexivity can be enhanced. Students learn of self-reflexivity and the reflection of communication processes. Students acquire a basic knowledge of methods in equal opportunities such as gender trainings, anti-racism trainings, anti-bias trainings and social justice and diversity training. Students will have practical training with these methods. Moreover, they are able to apply a variety of methods in equal opportunities to heterogeneous organizational settings and demands. They will reflect these practical approaches not only from the applied methods focus; but they will also analyse the approaches from a comparative and critical theoretical perspective.

Learning Outcomes*
<p>After successful completion of the module:</p> <ul style="list-style-type: none"> • Students understand basic concepts and theories of social inequality as well as social stratification. • They have learned that different dimensions of inequality intersect and reinforce one another. Specifically, they have acquired insight into the question how ‚race/ ethnicity, class, gender, and age intersect in the structure of a given society. • Students understand that ranking systems based on categories like wealth, gender, ‚race/ ethnicity, or age form important structural features of society. They learn to which extent the distribution of power and resources is related to these structures in society. • They understand the important consequences of these social structures for individuals' opportunities and experiences. • Students are able to read statistical data and apply theories of social inequality on case studies. <p><small>* 1 = Knowledge and Understanding, 2 = Use, Application and Production of Knowledge, 3 = Communication and Collaboration, 4 = Academic Conduct and Professionalism</small></p>

Content
<p>Social structure and social inequality</p> <ul style="list-style-type: none"> • The lecture gives insight in theories of social inequality and the analysis and measuring of social stratification. Life chances are distributed unequally in society. One important issue of theories of social inequality is to understand to what extent belonging to certain social strata or to social groups determines participation in economy and society. • Topics are theories of social class, social status, functional stratification, social space and practice, social milieus, theories on the construction of ‚race‘, the construction of gender. Measures of social structure are a further issue. • Questions raised are: Why does social inequality exist? How is it reproduced? What are dimensions of social stratification and social inequality? How has social inequality developed during time? What are issues of inequality today? • After learning about basic concepts of social stratification, the intersectionality of inequalities is discussed. • Measures of social stratification are dealt with. Students learn how social inequality is analysed not only within nation states but also internationally. For example, social milieu studies are referred to, that are also used for marketing issues. <p>Intersectionality and diversity</p> <ul style="list-style-type: none"> • In exercises students learn about the access of different social groups to resources. • In working groups the impact of life events on families of different social groups are being discussed using theories of social stratification and social inequality. • A particular focus is on the intersectionality of social inequalities experienced by families belonging to different social groups.

Learning Outcomes*
<p>Having completed the course:</p> <ul style="list-style-type: none"> Students will be able to describe the stages of quantitative research processes.¹ They have gained insight into different quantitative research designs and methods of data collection.² Students are able to present and communicate quantitative scientific data in a professional way.³ They can describe such data and illustrate it by means of high quality graphs.³ Students understand the basic concepts of hypothesis testing and have gained an overview of statistical approaches to data analysis.¹ They have learned how to draw conclusions from quantitative data using descriptive and inferential statistical methods.² They are aware of the limitations of quantitative data and be capable of using such data in an responsible way.⁴ <p><small>* 1 = Knowledge and Understanding, 2 = Use, Application and Production of Knowledge, 3 = Communication and Collaboration, 4 = Academic Conduct and Professionalism</small></p>

Content
<p>The course gives an introduction to quantitative research approaches and to relevant methods of data collection in the social sciences. Students will be introduced to the concept of measurement in the social sciences and its epistemological assumptions. Main topics will be quantitative research in applied social sciences, stages of the quantitative research process, the concept of hypothesis testing, quantitative methods of data collection such as questionnaires, behavioural observation, rating scales and experimental studies, quality criteria in quantitative research, and the basics of descriptive and inferential statistics.</p>

Learning Outcomes*
<p>After successful completion of the module:</p> <ul style="list-style-type: none"> • Students understand how work has become a highly relevant matter nowadays in many (post)industrial economies and societies.^{1a, 1b} • They know about the relations between paid work and unpaid care work and how work is linked to social stratification.^{1a, 1b} • Students have acquired an understanding of issues regarding sex segregated labour markets and other forms of segregation, including concepts like tertiarization, industrialism and post-industrialism. They have a basic knowledge of forms of workplace resistance and unionism.^{1a, 1b} • Students are able to address issues and problems in the world of labour independently and in a group.^{2a, 3, 4} • They have developed self-directed learning skills and collaborative learning skills, and are able to research and organize the required literature. Students are able to work in groups and moderate a group discussion, as well as document and reflect on group discussions.^{2a, 3} <p><small>* 1 = Knowledge and Understanding, 2 = Use, Application and Production of Knowledge, 3 = Communication and Collaboration, 4 = Academic Conduct and Professionalism</small></p>

Content
<p>The lecture gives an introduction to issues in the world of labour from a sociological and historical perspective. Work has become a central field for the organization of (post-) industrial societies today.</p> <p>The question of participation in society is strongly linked to work, even in a rapidly changing world. Starting with a historical perspective on the transformation of work during the time of industrialization, the course continues with conditions of mass production and the more recent changes which led to increasing requirements for flexibility and mobility of employees. One focus of this lecture is the question, how gender and gender relations contribute to the organization of work. A further focus is on other forms of diversity in the workforce and their impact in work and work relations.</p> <p>In the seminar students work on topics in the field of work in groups and individually. The aim is to learn how to address a specified topic and problem in the field of work, for example by using the method of problem based learning.</p>

Learning Outcomes*
<p>After successful completion of the module:</p> <ul style="list-style-type: none"> • Students understand core theories relating to society and its institutions^{1b} • They are able to identify which theory is useful to garner insight into an application example of their choice^{1c} • They are able to argue the strengths and weaknesses of their chosen theory (theories) within the applicable context^{2a} • They understand the format of an academic essay and are able to write one³ <p><small>* 1 = Knowledge and Understanding, 2 = Use, Application and Production of Knowledge, 3 = Communication and Collaboration, 4 = Academic Conduct and Professionalism</small></p>

Content
<p>The course introduces students to key models and theories relevant to the study of societies. Each session is divided between an introduction of a theory with reference to one of its representatives in lecture form and the study and discussion of primary literature on the lecture's topic.</p> <p>The course starts out with a reflection on the meaning and relevance of theories in sociology.</p> <p>In an exemplary structure, following this, students' knowledge of constructivist structuralism through the writings of Pierre Bourdieu is deepened. This is followed by an introduction to post-structuralism and the work of Michel Foucault. Next, the concept of hegemony and the importance of Antonio Gramsci's theoretical contributions to sociology are highlighted. Critical Theory is introduced to the course through the writings of Jürgen Habermas, structuration theory based on the work of Anthony Giddens. Other selected theoretical approaches might include Manuel Castell's Theory of a network society or World Systems Theory, with reference to the works of Immanuel Wallerstein and Saskia Sassen. The course potentially also broadens the knowledge of the students on feminist theories of society, such as Queer Theory or New Feminist Materialism.</p> <p>Students then are required to show the knowledge achieved e.g. in an essay, where they combine one of the theories out of the course with a societal phenomenon upon their own choice, working out the analytical and explanatory power (and possibly also weaknesses) of the respective theoretical approach. Throughout the course, the learning process is supported by the targeted use of documentaries, interviews, exemplary essays or the like.</p>

Learning Outcomes*
<p>After successful completion of the module:</p> <ul style="list-style-type: none"> • Students understand and can explain the process of bonding and community formation within society as well as problems and challenges that go with it. • They can distinguish different theoretical approaches and know about concepts on how to achieve social participation. • Students are able to plan and carry out a collaborative project. They have acquired self-directed learning skills and collaborative learning skills, and have learned to research and organize the required literature. • They can determine a specific aim or 'problem' for group work, the dimensions of this problem, how to plan dealing with this problem, including particular steps within this process. Apart from that, students are able to determine what is important in collaborative work, how tasks can be divided, how the collaborative process can be reflected. • Students are able to work in groups and moderate a group discussion, as well as document and reflect on group discussions. Moreover, students have developed their skills in academic writing. <p><small>* 1 = Knowledge and Understanding, 2 = Use, Application and Production of Knowledge, 3 = Communication and Collaboration, 4 = Academic Conduct and Professionalism</small></p>

Content
<p>During these courses students get insight into questions and challenges connected to the reproduction of society and the formation of community as well as participation in different realms of society.</p> <p>In the lecture students get insight into social theories about community formation and social bonding as well as the reproduction of society in societal institutions. These are core issues of sociology: How do we become a member of the society we live in? How can society be maintained? How are norms transferred between generations? Related to these questions are issues of belonging: Who belongs and who does not belong? What do power relations have to do with the question of belonging? Students get an understanding of the main theoretical concepts such as solidarity, community, society, integration and inclusion. Taking the increasing diversity of society into account, the course will focus on the question of how cooperation and living together can be achieved. In the seminar students work on topics in the field of integration and inclusion in groups and individually. The aim is to learn how to address a certain topic and problem focusing on societal participation, for example by taking up the method of problem based learning.</p>

Learning Outcomes*
<p>After successful completion of the module:</p> <ul style="list-style-type: none"> • Students know key methods and theories relevant to the study of culture.^{1a} • They understand the importance of gender, diversity and power in the context of studying culture.^{1b} • They understand the specific approach of Cultural Studies to the study of culture and power.^{1c} • They are able to apply the studied theories and methods to various expressions of culture.^{2a} • They are able to understand, summarize and critique academic texts.³ • They are able to produce a written account of applying methods and theories of Cultural Studies using appropriate academic standards and sources.³ <p><small>* 1 = Knowledge and Understanding, 2 = Use, Application and Production of Knowledge, 3 = Communication and Collaboration, 4 = Academic Conduct and Professionalism</small></p>

Content
<p>The course is divided in three main parts, the first of which introduces students to theories of culture and cultural studies. The second part deals with methods of researching culture, while the third part focusses on applications of the introduced theories and methods.</p> <p>In the theoretical part, the course first deals with different definitions of culture and its research. After this, the specific approaches of Cultural Studies are introduced. Finally, this part of the course deals with key concepts such as cultural meaning, language and representation. In the second part, different methods of studying culture are presented, as appropriate for the application examples chosen for the third part of the course. Part three, Cultural Sociology and Cultural Studies in Application, deals with topics such as the politics of exhibiting other cultures in museums, stereotyping and racializing the ‚other‘ in media coverage e.g. of sport events, the interaction of masculinity and consumption, or gendered representation in film.</p>

Learning Outcomes*
<p>After successful completion of the module:</p> <ul style="list-style-type: none"> • Students have developed and made use of academic skills necessary to fulfil the task of understanding, analysing and treating an academic issue independently.^{2a, 3, 4} • Students are familiar with design and implement projects focused on generating social impact.^{2a, 3, 4} • They know the most crucial tools, information, and additional resources how to create a project.^{2a, 4} • They are able to plan and implement a Project in the following six steps: Project Identification and Planning, Budgeting, Fundraising, Implementation and Coordination, Communications and Visibility, Monitoring, Reporting and Evaluation, Innovating in Project Management.^{2a, 3} • They are able to write a project report and to present the process and result of a project in front of the public.^{2a, 3, 4} • They are familiar with the definition of a project as a temporary endeavour, or series of activities, undertaken to achieve a specific result by an applied project with partners in the City or District of Kleve, or Germany wide. The students will have achieved knowledge about different resources, tools and guidelines that can provide them to finalise their project.^{2a, 3, 4} <p><small>* 1 = Knowledge and Understanding, 2 = Use, Application and Production of Knowledge, 3 = Communication and Collaboration, 4 = Academic Conduct and Professionalism</small></p>

Content
<p>Students get a list of topics related to one special field of studies or related to interdisciplinary work. Topics might be more practical, empirical or more literately oriented. According to the type of project, the term paper is a written report about the practical work and the findings or a scientific paper about one research area.</p> <p>At the end of the project the major findings have to be presented to all participants.</p> <p>In the first part of the course, students learn about that projects are constrained by limited resources and also have a specific duration, and therefore have a clear beginning and end.</p> <p>Projects are divided into six sections that encompass the project cycle, which refers to the different phases of a project. In each section, they learn basic information and aspects to keep in mind through a series of guidance and self-reflection questions.</p> <p>Students learn to research and find different types of sources, resources, tools and guidelines that provide them with further details. They learn to bring together tools, information, and additional resources, and to design and implement projects based on these, with the intention to generate social impact. Following this, the second part of the course introduces how to use tools of project management in specific steps: project identification and planning, budgeting, fundraising, implementation and coordination, communications and visibility, monitoring, reporting and evaluation. In the third part of the course, students apply this knowledge and design as well as carry out a specific project of their choice with an actor in civil society, the economy or public administration. This includes applying social science research methods as part of the project. Based on their experiences in planning and implementing the project, students produce a project report to present their results.</p>

Learning Outcomes*
<p>Upon successful completion of the module, students will:</p> <ul style="list-style-type: none"> • Know about the institutional framework and the legislative procedures of the European Union¹ • Demonstrate knowledge of key players in policy advice and consulting¹ • Be able to evaluate different policy proposals for an identified problem, based on objective evaluative criteria • Be able to critically reflect the role of consultants and lobbying in policy making^{2, 4} • Be able to draft policy briefs^{2, 4} • Be able to develop consulting proposals and pitch these in front of a possible customer^{3, 4} • Have the competence to give policy recommendations^{3, 4} <p><small>* 1 = Knowledge and Understanding, 2 = Use, Application and Production of Knowledge, 3 = Communication and Collaboration, 4 = Academic Conduct and Professionalism</small></p>

Content
<p>The course provides a basic introduction into the field of politics, by studying the legislative procedures of the European Union and its actors, as the EU is a relevant policy-maker with respect to gender and diversity issues. It analyses the policy-cycle, discusses evaluative criteria for different policies and methods on how to propose alternatives. Based on this foundation, the focus turns to the more practical issues in real policy-making by discussing the role of various actors in policy design and advice, e.g. the political-administrative system, the scientific community, commissions and lobbyists.</p> <p>The students learn to evaluate policy proposals based on evaluative criteria and to give policy recommendations by drafting policy briefs.</p> <p>In a second step, students will see the typical steps of a tendering process for consultants and learn the phases of a consulting project. They will develop a consulting proposal for a policy advice assignment that needs to be delivered in a typical "consulting pitch" situation to a possible political decision maker as customer. For this, they practice the required skills and conduct in the consulting environment, e.g. project management skills, effective slide-writing and oral presentation.</p> <p>Thus, the course delivers students the required qualifications for the tasks and the role of a political advisor in parliament, ministries, foundations, companies or various other (N)GOs.</p> <p>Content-wise the main focus is on the provision of equal opportunities and managing diversity, qualifying students to use political instruments to eliminate discrimination in any form.</p> <p>During the course, students get every opportunity to practice their knowledge using specially designed role play simulations of consulting situations.</p> <p>Topics include but are not limited to:</p> <ul style="list-style-type: none"> • Fundamentals of public policy in the European Union • Key analytical categories in the field of policy analysis and design • Aims and actors in policy-making • The Consulting Process • Drafting and delivery of effective consulting proposals • Critical perspective on the policy advice business

Learning Outcomes*
<p>After successful completion of the module:</p> <ul style="list-style-type: none"> • Students have a basic understanding of the theoretical approaches to the analysis of bodies, embodiment and health from theoretical points of different disciplinary perspectives.^{1a, 1b} • Students are familiar with theoretical approaches to identities and belonging with respect to gender and diversity, while deepening into the issue of embodiment and materiality, connected to diversity and affecting lives on individuals in society.^{1b} • The students are able to analyse the health sector and health systems from an economic point of view^{2a}, and to place this specific analytical perspective into an interdisciplinary framework.^{1c} • While analysing norms, students have gained insights into power and incentive structures regulating gender and diversity^{1c} (gender regimes, gender policies, education, and health sector) and learned to detect needs of individual actors, the stakeholders, responsible for health regulations and their goal settings^{2a, 2b} and practice of societal norming diversity and inclusion/exclusion as well as approaches of activism, support and inclusion.^{2b, 4} • Students understand the embodiment and materiality of gender and diversity and have acquired knowledge of the complex power and incentive structures and normalisation processes, as well as regulations, reproduction and allocation of resources with respect to health, and how these topics can be studied.^{1c, 2a, 2b} • Students can apply critical notions of norms and power on the issues of sexuality, dis/ability and health, while reflecting on central actors, involved in setting,^{1c, 2b, 4} putting into practice and sanctioning the deviation from norms allying to bodies, gender identities and health.⁴ <p><small>* 1 = Knowledge and Understanding, 2 = Use, Application and Production of Knowledge, 3 = Communication and Collaboration, 4 = Academic Conduct and Professionalism</small></p>

Content
<p>Sociology of body and health: Discussions of body-related policies, gender regimes and their connections to sexual citizenship and queer lives, conception of public health as well as regulations of sexualities and reproductive health topics, are combined with sociological approaches on medicalisation, industrialisation, production and norming of bodies.</p> <p>The sociological conceptions of norms, institutions, power, participation and identity are being applied to the phenomena of gender and diversity, thus elaborating theoretically and practically on the constructivist, queer and critical approaches towards gender, race, (dis-)ability and sexualities.</p> <p>Approaches from queer studies, critical whiteness, ableism studies as well as approaches from gender studies, sociology of health and dis/ability and participation studies are being discussed on applicable examples.</p> <p>Health economics: The class on Health Economics provides in a first step a survey of the standard economic approach to the health sector and health systems. Hence, the focus is on the allocation and distribution of health goods and services. Their demand and supply, and the one of health insurances will be analysed, with a special emphasis on market failure aspects, such as asymmetric information and externalities. In addition, fundamental questions of economic evaluation and managed care will be introduced. In a second step this economic point of view will be applied to recent health sector issues and set into an interdisciplinary framework.</p>

Module GD 4 6022: Gender Theories

Classification	Study Semester	Offer	Equivalent	Language	Responsible Professor
Required Module	4	Summer Term	-	English	Prof. Dr. Eva Maria Hinterhuber

Size of Group	Workload	Contact Hours	Self-Study	Credit Points
up to 72	150 h	60 h	90 h	5

Formal Prerequisites	Recommended Prerequisites	Further Information
-	-	-

Learning Outcomes*
<p>After successful completion of the module:</p> <ul style="list-style-type: none"> The students are familiar with the main theoretical threads from the field of Gender Studies.^{1a} They are able to identify threshold concepts of gender theories.^{1b} They are capable of working with different types of academic texts, including primary and secondary sources, theoretical texts and applications of theory.^{2a} They have a deepened understanding of how gender theories apply to a selected specific subject area.^{2a} Students know how to give a presentation based on academic sources and how to reproduce their knowledge in a written examination.³ <p><small>* 1 = Knowledge and Understanding, 2 = Use, Application and Production of Knowledge, 3 = Communication and Collaboration, 4 = Academic Conduct and Professionalism</small></p>

Content
<p>Each session of the course discusses a different key concept or strand of a specific gender theory. In the first half of the session, students receive an introduction about the session's theory and are able to familiarize themselves with it on the basis of both textbooks and primary sources. In the second half, possible applications of the theory are explored by reading, presenting and discussing a text from the course's focal topic where the respective theoretical approach is referred to, such as e.g. the subject area gender, war and peace (the outline of the sessions can be modified to give each cohort a specific theoretical or thematic focus).</p> <p>The course covers a broad spectrum of threshold theories, ranging from Liberal Feminism, Radical Feminism and Standpoint Feminism over Social Constructivism, Deconstructivist Gender Theories to Intersectionality, Postcolonial Gender Theories and Theories of Masculinity. Further sessions can examine theoretical branches such as Queer Theory, New Feminist Materialism and Affect Theory.</p> <p>The introduction into the respective theories is complemented with their application to a chosen focal topic. This means that e.g. in the above mentioned case of gender, peace and war the examination of Liberal Feminism is complemented with research on equality in the context of armed forces; Radical Feminism and its credits in addressing sexualized violence are examined also with respect to armed conflicts; Standpoint Feminism is approached by reflecting gendered peace activism etc. This procedure is applied also to the other mentioned theories such as Social Constructionist Approaches, Intersectionality, Postcolonial and Deconstructivist Gender Theories and Hegemonic Masculinity.</p>

Learning Outcomes*
<ul style="list-style-type: none"> Based on GD 2 6007 Qualitative Research Methods and GD 2 6010 Quantitative Research Methods, students have acquired further knowledge on the practical application of empirical research methods.² Having completed this module, they are capable of designing their own empirical research projects related to questions in the fields of gender and diversity studies.² Additionally, they are familiar with the theory and practice of experimental research approaches in the social sciences.¹ Having successfully completed this module, students have a critical understanding and knowledge of methods and concepts necessary for planning, implementing, and conducting empirical research projects.¹ Graduates of this module are able to critically reflect the pros and cons of different research methods for sociological research.⁴ Participants are able to organize collaborations for empirical projects and to present and discuss the outcome of their research.^{3, 4} <p><small>* 1 = Knowledge and Understanding, 2 = Use, Application and Production of Knowledge, 3 = Communication and Collaboration, 4 = Academic Conduct and Professionalism</small></p>

Content
<p>The first part of the course offers an overview of the use of empirical methods in applied social research. During the course, students learn to transfer their methodological knowledge to concrete research projects in the fields of gender and diversity. Exercise phases will allow students to practice the application of different empirical research methods. The second part of the course introduces students to the theory and practice of designing, implementing, conducting, and evaluating the outcomes of experimental studies in the social sciences. Students will be acquainted with classical experimental studies in the fields of gender and diversity. The main topics will be an introduction to experimental designs in the social sciences, the theoretical background of experimental research, the devising of hypotheses and the operationalization of research questions, and the application of quantitative research methods.</p>

Required Module	5	Winter Term	-	English	Prof. Dr. Eva Maria Hinterhuber

Size of Group	Workload	Contact Hours	Self-Study	Credit Points
up to 72	150 h	60 h	90 h	5

Formal Prerequisites	Recommended Prerequisites	Further Information
-	-	-

Learning Outcomes*
<p>After successful completion of the module:</p> <ul style="list-style-type: none"> • Students are familiar with the legal framework for antidiscrimination and gender equality measures.^{1b} • They know the most crucial tools for antidiscrimination measures in different areas of society.^{1b} • They are able to plan and implement at least one of the presented tools in an area of their choice.^{2a, 4} • They are able to write a project report to present the process and result of an antidiscrimination measure.³ • They are familiar with the form of a scientific poster and are able to present their work in this way.³ <p><small>* 1 = Knowledge and Understanding, 2 = Use, Application and Production of Knowledge, 3 = Communication and Collaboration, 4 = Academic Conduct and Professionalism</small></p>

Content
<p>In the first part of the course, students learn about the legal framework for anti-discrimination and gender mainstreaming measures. A special focus of the course lies on the global and supranational level, thus the UN gender policy and the gender equality and anti-discrimination policy of the European Union, as well as its national equivalent – in the case of Germany, thus, the main focus is again on gender mainstreaming and anti-discrimination, taking again legal frameworks and institutions into account.</p> <p>Following this, the second part of the course introduces tools of gender mainstreaming and anti-discrimination, ranging from top down implementations of gender mainstreaming, gender impact assessment and gender training over gender budgeting, gender and diversity competence, a gender/diversity/queer analysis of organizations to the work of gender equality offices and diversity management.</p> <p>In the third part of the course, students themselves have to get active in research, e.g. by designing and carrying out research about a gender mainstreaming or anti-discrimination project with an actor from civil society, economy, or the state. This includes applying social science research methods such as expert interviews or document analysis as part of the project. Based on their experiences in planning and implementing the project, students produce a project report and a scientific poster in order to present their results.</p>

Learning Outcomes*
<p>After having completed the module,</p> <ul style="list-style-type: none"> Students understand and know how to apply qualitative empirical research methods with a focus on issues and theoretical approaches of gender and diversity studies and practice fields.^{1b, 1c, 2a, 4} Students know how to record qualitative interview data and to work with software for the preparation of audio data and audio-visual data for interpretation (MAXQDA) and deepen their knowledge of scientific skills.^{1b, 1c, 2a, 4} Students know how to design and carry through small-scale research projects in small project groups, in order to explore relevant issues of the topic. They will work with focus group interviews or individual interviews and their analysis.^{2a, 3, 4} Students carry through an empirical research and learn how to apply the different steps during the process of empirical research. They learn to develop their skills in collaborative work.^{2a, 3, 4} <p><small>* 1 = Knowledge and Understanding, 2 = Use, Application and Production of Knowledge, 3 = Communication and Collaboration, 4 = Academic Conduct and Professionalism</small></p>

Content
<ul style="list-style-type: none"> In the first part of the project the focus will be on specifically one method of qualitative data collection, such as the qualitative expert interview or focus group interview, that shall be dealt with more in depth in this course. Apart from that, an appropriate method of qualitative data analysis is introduced, specifically qualitative content analysis. Transcription and coding are further contents of the course. In the second part of the course students apply this knowledge by developing the research design for one small-scale research project, by conducting an interview and doing the transcription of one interview. Alternatively, they use recorded qualitative data, do the transcription and prepare and organize the data for interpretation with content analysis. At the end of the project, a project report is written, focussing on the course of the research project and the reflection of the steps in the research, including the transcription of the interview.

Learning Outcomes*
<p>After successful completion of the module:</p> <ul style="list-style-type: none"> • Students are familiar with core issues relating to gendered aspects of mobility^{1a} • They are aware of how different forms of work relate to gender and migration^{1c} • They have a nuanced view of gender and mobility in different areas of society (family, civil society, economy)^{1b} • They are familiar with academic discourses relating to issues around migration and their specific gendered impacts^{1b} <p><small>* 1 = Knowledge and Understanding, 2 = Use, Application and Production of Knowledge, 3 = Communication and Collaboration, 4 = Academic Conduct and Professionalism</small></p>

Content
<p>The course addresses different forms of mobility and migration through a gendered lens. It starts out by a general look at gender, mobility and migration, and following this, moves on to examine a wide range of aspects of the given subject area. The thematic areas dealt with include for instance gendered aspects of migration and work; and/or a closer look is taken at the role of domestic and care work in mediating the relationship between gender and mobility. Further sessions can examine the topics of marriage and migration or transnational mothering. The course also introduces academic perspectives on gender and asylum, and on the civic participation of migrant women. Finally, it addresses the issues of human trafficking and sex tourism and their gendered aspects. Against this background, students are given the possibility to choose and specialize in one of the mentioned topics in order to get not only an overview about gender and mobility, but also to deepen their knowledge on a selected aspect of it.</p>

Learning Outcomes*
<p>After successful completion of the module:</p> <ul style="list-style-type: none"> • Students are familiar with interdisciplinary (medical/psychological, cultural/constructionist as well as sociological and political science) approaches to sexualities.^{1a, 1b} • Graduates are able to apply those theories on topics like sexual violence, trafficking, sexuality and identity construction.^{1c, 2a} • Students are able to discuss the conceptions of heteronormativity, gender regimes on sexualities, institutional control over sexualities.^{1c, 2a} • They can reflect on power relations with respect to sexualities.^{1c} • Students are able to explain how sexualities are being reflected in different societal fields (education, media, capitalist production, etc.).^{2a} • The students can analyse forms of exclusions and discrimination with respect to sexualities.^{2b, 3} <p><small>* 1 = Knowledge and Understanding, 2 = Use, Application and Production of Knowledge, 3 = Communication and Collaboration, 4 = Academic Conduct and Professionalism</small></p>

Content
<p>In this module, a multidisciplinary approach offers a broad perspective on various aspects of sexuality.</p> <p>Interdisciplinary approach helps students to understand the complexity of meanings and framings of sexuality in a society; Sexual identities and biographical phases of sexuality developments (like sexual development in childhood and adolescence, elderly) will be taken up. From a historical constructivist perspective, students learn how sexuality has been constructed in specific historical periods and how sexuality is linked to the development of modernity and the concept of the individual through (self-) discipline. Students learn the conception of sexual citizenship, sexual regimes, LGBTTIQ-activism and political participation with respect to sexualities; sexuality is addressed as the site of the reproduction of power relations between individuals and between social groups, on the grounds of the intersection of social structures related to gender, ethnicity, class as well as age.</p>

<p>After successful completion of the module:</p> <ul style="list-style-type: none"> Students are familiar with different fields of research in (dis-) ability studies and are able to critically reflect assumptions about bodies and health.^{1a, 1b, 1c} They know about legal regulations^{1b} that are the basis for welfare provisions for people with special needs as well as people who are threatened by bodily, mental as well as psychological impairment.^{1c} They are able to reflect on and analyse the forms of exclusions and discriminations with respect to dis/abilities.^{1c, 2a} They have a basic knowledge of the history and, related to this, contemporary as well as former claims of the disabled movements^{1b} and are able to analyse and anticipate the developments of these claims.^{2a, 2b} Students are familiar with the critical perspective of ableism studies.^{1c} <p><small>* 1 = Knowledge and Understanding, 2 = Use, Application and Production of Knowledge, 3 = Communication and Collaboration, 4 = Academic Conduct and Professionalism</small></p>

Content
<p>The courses in this module focus on different fields of interest in (dis-) ability studies.</p> <p>Central topics are legal regulations applying to the situation of people with impairments. On this level, on the one hand, welfare state provisions for people with impairments are determined. On the other hand, antidiscrimination policies are founded legally.</p> <p>Moreover, students get acquainted with welfare state institutions providing support for people with impairments. In the seminar students focus on specific topics in (dis-) ability studies, e.g. history of the disabled movements and their claims as well as how they have impacted conceptions of health and the body, challenging assumptions about the 'normal' body and bodily sensations.</p> <p>Conceptions of inclusion and discriminations with respect to "ability" are being discussed, using power critical theories, theories of critical ableism and theories of participation.</p>

Learning Outcomes*

After successful completion of the module:

- Students are able to analyse welfare states and market economies as institutions of societal integration.
- They have basic knowledge of social and labour market policy from an interdisciplinary perspective (including sociology, economics, and political science), with special attention to the intersections of different categories of inequalities such as gender, ethnicity, class, and sexual orientation on both theoretical and practical levels.

* 1 = Knowledge and Understanding, 2 = Use, Application and Production of Knowledge, 3 = Communication and Collaboration, 4 = Academic Conduct and Professionalism

Content

Social policy:

Students will learn the fundamentals of policy tools for improving human welfare. Throughout the seminar, a gender and diversity perspective is applied, and issues of gender and diversity are systematically taken into account. Upon completion of this module, students will be familiar with basic human needs and the policy strategies for the maintenance, creation or changing living conditions that may be beneficial to human welfare.

After successful completion of this course, students are able to describe, and, from a gender and diversity perspective, critically reflect the means in which human welfare and social protection is established in a society.

Theories and scientific evidence to improve human welfare with regard on social needs like food, education, and health, as well as possible political activities are introduced.

Major topics will include:

- Welfare state and social security
- Social housing
- Environmental policy
- Education policy and child protection
- Health policy
- Criminal justice

Labour market policy:

Students will acquire a basic understanding of the fields of labour market policy and are able to apply this to topics of international and global relevance. They will be familiar with the principle concepts of regulation of labour markets with regard to employment relationships and are able to explain, which forces and processes shape this regulation. They will examine the causes and effects of gender differences in labour force participation, earnings and occupation, as well as challenges of diversity in the labour market.

At the end of the course, students will be able to analyse labour market policies from a gender and diversity perspective. They will have a thoroughgoing knowledge of the range of policy instruments. Furthermore, they will understand the socio-political and economic determinants of labour market policy variation and change.

Learning Outcomes*
<p>After successful completion of the module:</p> <ul style="list-style-type: none"> Students will be familiarized with theoretical concepts of decision and game theory.¹ The students will have the ability to classify different situations of individual decision - making in terms of certainty, risk and uncertainty.² They learn how to characterize risk neutral, risk averse or risk seeking decision maker.² With game theoretical tools the students learn to model and analyse strategic behaviour in situations of interactive decision making.² The students are able to design, run and analyse experiments related to behavioural finance.³ By applying a semi-formal interactive discussion scheme they learn how give a structured game theoretical model of an actual political crisis.^{3,4} <p><small>* 1 = Knowledge and Understanding, 2 = Use, Application and Production of Knowledge, 3 = Communication and Collaboration, 4 = Academic Conduct and Professionalism</small></p>

Content
<ul style="list-style-type: none"> The course covers mathematical preliminaries for decision and game theory. The main focus in this class lies on rational individual and interactive decision making. There will be an introduction to axiomatic utility theory and the formalization of risk attitudes of decision maker. Decision theory covers individual decision making contains individual decision making under certainty, risk and uncertainty. The course covers mathematical techniques and tools of non-cooperative game theory. The following decision rules will be discussed: Minimax, Maximin (Wald), Maximax, Minimal regret (Savage-Niehans), pessimism-optimism (Hurwicz), Laplace; μ-rule, Bernoulli rule, μ-σ-rule. Game theory covers interactive non cooperative and cooperative decision making: This includes games with imperfect information and sequential games, and extending to some more special topics like Bayes games, evolutionary games, mechanism design as well as social choice and welfare. An introduction to cooperative game theory will be done. Several applications of game theory will be discussed: Arrow paradox, Voting Games, Measuring of Power, Auctions, and Mechanism Design.

Module GD 4 6036 / GD 5 6036: Foreign Language

Classification	Study Semester	Offer	Equivalent	Language	Responsible Professor
Elective Module	4 / 5	Winter and Summer Term	-	-	International Center

Size of Group	Workload	Contact Hours	Self-Study	Credit Points
up to 36	150 h	52 h	98 h	5

Formal Prerequisites	Recommended Prerequisites	Further Information
appropriate proficiency for the specific course level	-	-

Learning Outcomes*
At the end of the course, students are able to communicate appropriately, depending on their level. They learn how to expand their vocabulary and strengthen their knowledge of grammatical structures, developing all relevant language skills and rhetorical skills, acquiring autonomous learning strategies in the used language.

Content
<ul style="list-style-type: none"> • Developing oral communication and writing skills • Expanding and consolidating vocabulary • Practising and consolidating existing grammatical and rhetorical structures • Acquiring and practising autonomous learning strategies

Course(s)	Contact Hours
GD 4 6036 / GD 5 6036: Foreign Language (Lecture)	4

Requirements for the Awarding of Credit Points	Possible Examination	Significance of Mark
Examination	Written Exam, Final Presentation, Project Work or Combination	2,5 %

Module GD 6 6037: Internship or Semester Abroad

Classification	Study Semester	Offer	Equivalent	Language	Responsible Professor
Required Module	6	Summer Term	-		Supervisor (Professor of HSRW)

Size of Group	Workload	Contact Hours	Self-Study	Credit Points
-	-	Internship <ul style="list-style-type: none"> • 20 weeks, full-time Semester Abroad <ul style="list-style-type: none"> • Depends on host university 	-	30

Formal Prerequisites	Recommended Prerequisites	Further Information
90 CP	-	-

Learning Outcomes*
<p>After successful completion of the module, students are able to apply the knowledge and skills acquired in the course of study in the career setting of their choice. Students are able to reflect on and evaluate the experience gained during the practical activity and to make this experience of use for the subsequent phase of studies and clarify their career paths. Students develop their professional identity, decision making and networking skills.</p> <p><small>* 1 = Knowledge and Understanding, 2 = Use, Application and Production of Knowledge, 3 = Communication and Collaboration, 4 = Academic Conduct and Professionalism</small></p>

Content
<p>Internship: See additional document on internship regulations</p> <p>Semester Abroad: Preparation: An introductory workshop will support outgoing students in successfully mastering all crucial organisatory aspects of their stay abroad. In particular, it will guide students in setting up their study plans and optimising their learning process through self-control of learning, regular critical reflection, and mastering academic and social challenges. Peer-teaching by former outgoing students will be part of this workshop.</p> <p>Reflection: Students write a report containing a critical reflection of study-related knowledge gained from courses and through living in a host country. Depending on the particular study programme, the focus may be on the current political, societal, or economic discourse. It also should include a critical assessment of the intercultural, communication, professional, and language skills acquired during the semester. This should be complemented with materials on country and study conditions at the host university that can be made available to future outgoing students. Regarding the latter, flexible and entertaining presentation forms as blogs, films, or interviews are possible and welcome.</p>

Requirements for the Awarding of Credit Points	Possible Examination	Significance of Mark
Internship <ul style="list-style-type: none"> • Recognition of internship • Internship report Semester Abroad <ul style="list-style-type: none"> • Recognition of host university and courses • At least 20 CP from host university • 10 CP for preparation and final report 	-	"passed" or "not passed"

Module GD 7 6038: Workshop: Academic Writing

Classification	Study Semester	Offer	Equivalent	Language	Responsible Professor
Required Module	7	Winter and Summer Term	IBM 7 6038, IR 7 6038	English	N. N.

Size of Group	Workload	Contact Hours	Self-Study	Credit Points
up to 36	150 h	60 h	90 h	5

Formal Prerequisites	Recommended Prerequisites	Further Information
-	-	-

Learning Outcomes*
Students are able to develop and present their ideas effectively according to academic standards. To develop their academic writing skills, they are able to apply practical and creative writing strategies as well as productive writing habits.
<small>* 1 = Knowledge and Understanding, 2 = Use, Application and Production of Knowledge, 3 = Communication and Collaboration, 4 = Academic Conduct and Professionalism</small>

Content
<p>Main Topics to be covered:</p> <ul style="list-style-type: none"> • Reviewing most important aspects for the academic writing process using examples • Software application for academic writing (e.g. LaTeX, MS Word) • How to write an essay plan • Appropriate presentation of thesis, e.g. abstract, poster and multimedia presentation

Course(s)	Contact Hours
GD 7 6038: Workshop Academic Writing (Project)	2

Requirements for the Awarding of Credit Points	Possible Examination	Significance of Mark
Certificate	Term Paper, Presentation or any Combination	Unmarked

Module GD 7 6039: Applied Project

Classification	Study Semester	Offer	Equivalent	Language	Responsible Professor
Required Module	7	Winter and Summer Term	-	English	N. N.

Size of Group	Workload	Contact Hours	Self-Study	Credit Points
up to 72	150 h	30 h	120 h	5

Formal Prerequisites	Recommended Prerequisites	Further Information
-	GD 2 6007, GD 2 6010, GD 3 6018, GD 5 6024, GD 5 6026	-

Learning Outcomes*
Students are able to manage and design a research project and demonstrate that they are able to organise, structure and document the research results of a real case project by applying empirical and methodical concepts. This includes research design and techniques of data collection as well as issues in the understanding, analysis, and interpretation of empirical data.
<small>* 1 = Knowledge and Understanding, 2 = Use, Application and Production of Knowledge, 3 = Communication and Collaboration, 4 = Academic Conduct and Professionalism</small>

Content
Students will pass all stages of the research process and adapt principles of applied projects. This may involve the design of appropriate questionnaires or interviews, collecting data and drawing conclusions from empirical data. Thereby, students will enhance their application-oriented methodological knowledge and write, report and present conclusions to hypothetical clients/committees.

Course(s)	Contact Hours
GD 7 6039: Applied Project (Practical Training)	2

Requirements for the Awarding of Credit Points	Possible Examination	Significance of Mark
Examination	Term Paper, Presentation or any Combination	2,5 %

Module GD 7 6040: Project

Classification	Study Semester	Offer	Equivalent	Language	Responsible Professor
Required Module	7	Winter and Summer Term	-	English	N. N.

Size of Group	Workload	Contact Hours	Self-Study	Credit Points
up to 30	150 h	30 h	120 h	5

Formal Prerequisites	Recommended Prerequisites	Further Information
-	GD 3 6018, GD 5 6024, GD 5 6026	-

Learning Outcomes*
Students are able to develop and make use of academic skills necessary to fulfil the task of understanding, analysing and treating an academic issue independently.
<small>* 1 = Knowledge and Understanding, 2 = Use, Application and Production of Knowledge, 3 = Communication and Collaboration, 4 = Academic Conduct and Professionalism</small>

Content
The course gives an overview of all topics covered during studies and helps making linkages between those. Issues on current relevant topics are discussed and reviewed academically.
Students have to work independently on a given task (e.g. research area, current issue), which needs to be reflected and discussed academically.

They are able to answer topic related questions and apply theoretical instruments. <p><small>* 1 = Knowledge and Understanding, 2 = Use, Application and Production of Knowledge, 3 = Communication and Collaboration, 4 = Academic Conduct and Professionalism</small></p>

Content
<ul style="list-style-type: none"> The bachelor thesis is presented and discussed.

Requirements for the Awarding of Credit Points	Possible Examination	Significance of Mark
Examination	Oral Examination	5 %

2.4. Forms of Examination

Examinations in a certain module may be based on a combination of different forms of examination, e.g. a short presentation and a term paper. However, there is always only one exam and one overall grading in each of the modules.

Written Examinations	Description	Length
Bibliography	Collection of literature on an assigned topic	-
Code System	Overview of codes and subcodes including detailed definitions/descriptions for at least five of the subcodes, examples as well as (if applicable) coding norms	ca. 2 pages
Essay	Argument-based exploration of a topic/question, to be written alone or with a partner	ca. 8 pages (longer if written collaboratively)
Exposé	Statement of the research objective Research question(s) and its/their explanation, literature review and theoretical framework, description of the methods used, explanation of methods and planned procedure	7-10 pages
Interview Guideline	A guideline for structuring an interview, has to include the research topic and question as well as their operationalisation in interview questions	1-2 pages
Interview Transcript	Transcript of verbal and nonverbal communication from an audio or video recording of an interview	ca. 7 pages, depending on interview length
Learning Journal	Written reflection on learning process and outcomes	3-12 pages (depending on the course)
Minutes of a Lecture	Documentation of one session	-
Policy Brief	Definition and description of an individually chosen political problem with currently debated alternatives	6 pages
Project Plan	Group presentation on components learned in the students' own project as well as its outcomes	7-10 pages
Reading Assignment	Summary and critical examination of an assigned reading	ca. 2 pages
Research Report	To be written individually or in pairs	3-12 pages per person (depending on the course and further examination requirements)
Study Trip Report	Short report on experiences during the study trip, reflecting on the visited institution	ca. 2 pages
Term Paper	Literature-based exploration of a research question, can be written alone or with a partner	5-10 pages (longer if written in pairs)
Written Exam	-	60 or 120 minutes

Oral Examinations	Description	Length
Discussion of a text	Comments and questions regarding a text which has been presented by a different student	ca. 10 minutes
Facilitation of assessment	Discussion of assigned texts and moderation of group work	ca. 60 minutes
Oral Exam	In groups of 3-4 students	ca. 30 minutes
Policy Advice Pitch	Roleplay/presentation in groups, focusing on a solution to a political problem	ca. 10 minutes, accompanied by about 10 pages of slides and attachments
Presentation	Research and preparation of information on a topic or text, usually conducted in groups and based on presentation slides and a handout	ca. 15-30 minutes
